OBJECTIVE

I am seeking a role that provides opportunities to tackle meaningful challenges, expand my knowledge, and grow within a healthy and supportive work environment.

EXPERIENCE

FREELANCER

2021-2023

- Communicate with clients to gather requirements and clarify system needs.
- Transform client requirements into clear technical instructions for developers.
- Discuss and explain system workflows and functionalities to clients in an easy-to-understand way.
- Coordinate with developers to ensure accurate implementation of system features.
- Create project plans, timelines, and task breakdowns to guide development.
- Act as a bridge between clients and the development team to ensure smooth project execution.

CUSTOMER SERVICE REPRESENTATIVE

Staff Alliances Inc. - February 2024 - October 2024

- Handled inbound and outbound calls to assist customers with inquiries, concerns, and account-related issues.
- Provided clear, professional, and friendly communication to ensure a positive customer experience.
- Identified customer needs and offered appropriate solutions or guidance.
- Documented call details and follow-ups accurately in the system.
- Resolved complaints efficiently while maintaining high customer satisfaction.
- Collaborated with team members to meet performance targets.
- Managed high call volumes while remaining calm, patient, and service-oriented.

ASSOCIATE SOFTWARE ENGINEER

Accenture - November 2024 - Present

Technical Support Engineer

- Troubleshoot setup, integration, and functionality problems for businesses with Reserve and Ordering with Google
- Used Salesforce to respond to customer inquiries about Reserve with Google booking issues
- Document issues, track trends, and escalate bugs or recurring problems to product support teams.
- Performed frontend testing and troubleshooting on Google Reservations to ensure a smooth and reliable user experience using Google Search and Maps.
- Worked closely with clients to address concerns and ensure timely resolution of issues.
- Provided mentorship to new team members by explaining workflows, setting expectations, and offering ongoing support to improve performance and confidence.

Microsoft Certified: Azure Fundamentals

- Validated knowledge of core cloud concepts, Azure services, security, and pricing.
- Demonstrates understanding of Azure compute, storage, networking, identity, and governance.
- Confirms ability to support cloud-based solutions and contribute to Azure-focused development or infrastructure projects.
